Anti-Ageing Peel off mask *Laminaria digitata & Spirulina*

Description

The Anti-Ageing Peel off mask is a special formulation which has been developed in our Laboratories and designed to fit the exact shape of your face, thereby encouraging the action of its different ingredients.

This mask derives its special properties from the combined action of ingredients that rejuvenate the skin. Because of their strong anti-oxidant powers, they reduce the damage caused by external attacks such as adverse weather and pollution and the effects of time, thereby helping preserve the skin's healthiness.

Nature of the product

This mask is a marine complex based on alginates which are extracted from Laminaria, and provide its natural smooth texture. Setalg combines it with Algovert® and Spirulina that have synergistic properties. The mask quickly turns into a gel form when mixed with water.

Uses

Properties

The Anti-ageing Peel off mask promotes cell renewal by supplying amino acids from the **Spirulina**, that are essential for the supporting tissues.

It also has strong antioxidant properties of trapping and neutralising free radicals. Cell renewal is stimulated, wrinkles are reduced because the skin becomes more elastic and the adverse effects of sunshine are overcome. The skin is gently re-moisturised by the kelp **alginates**.

Application

- For a face treatment, mix 30 g of powder and 90 g of water at room temperature (20-25°C).
- Mix vigorously (+/- 1 minute) until you obtain a smooth and homogeneous texture.
- Apply the treatment immediately in a semi-thick layer on a cleansed skin (avoid the eye contour and eyebrows).
- The mask will dry within 6 minutes.
- Leave the mask in place for at least 10 minutes, then peel off in a single movement to leave the skin clean and lightly perfumed with the subtle fragrance of pink grapefruit.

Characteristics

Presentation	Powder
Colour	Green
Fragrance	Pink grapefruit
Shelf life	24 months
Storage	In a clean and dry place, away from sunlight, at room temperature (20-25°C)
Customs tariff number	33 04 99 00
Packaging	20 kg bags 1 and 3 kg plastic buckets Sachets

→ Special packaging in sachets on request

Specifications

Mesophilic aerobic flora	≤ 1000 UFC/g
Yeasts	≤ 100 UFC/g
Moulds	≤ 100 UFC/g
Pathogens	None

Customized formulation

Setalg can develop your own formulations by choosing your ingredients, fragrances, colours and actives.

Let's work together for a better health through a beautiful body!
