Description

Hot Chocolate Mousse is a formula that was specially developed and studied by our Laboratories to tone and firm the epidermal tissue. This Hot Chocolate Mousse has a rich and airy light structure, which is similar to Sabayon, an Italian dessert that is highly appreciated by gourmet food lovers.

Thanks to this product, clients will enjoy the savoury pleasure of chocolate during treatment application in Beauty Institutes and Spas.

Nature of the product

The Hot Chocolate Mousse is formulated on a cocoa base, which is rich in minerals and antioxidant molecules that restore radiance to the skin.

Uses

Proprieties

Theobromine, a cocoa molecule, triggers the lipid attaché process and thus helps eliminate unwanted fat. Its high concentration in minerals, particularly magnesium, is essential to maintaining muscle tone in the body.

The **polyphenols** and **vitamin A** from cocoa have anti-free radical properties that inhibit the cutaneous aging process.

Laminaria is rich in **alginates**, which restore silky softness to the skin. The skin regains strength and vitality.

Moreover, the self-heating effect promotes relaxation and perspiration, thus helping eliminate toxins and boost penetration of the active ingredients.

Applications

- For a body care treatment, mix 200 g of powder with 230 g of warm water ($\pm 35^{\circ}\text{C}$) until you obtain a smooth and homogenous texture.

- Leave to rest for several minutes.

- Apply to the entire body after thoroughly cleansing the areas requiring treatment.

- Leave on for 20 to 30 minutes

- After removing the wrap at the end of the treatment, take a warm shower.

Characteristics

Presentation	Powder
Colour	Cocoa
Fragrance	Cocoa
Shelf life	29 months
Storage	In a clean and dry place, away from sunlight, at room temperature (20 – 25°C)
Customs tariff number	33 04 99 00
Packaging	25 kg bags 2 and 5 kg plastic buckets Sachets

→ **Special packaging on request**

Specifications

Mesophilic aerobic flora	≤ 1000 UFC/g
Yeasts	≤ 100 UFC/g
Moulds	≤ 100 UFC/g
Pathogens	None

Customized formulation
